

Types of Plants

Plants are living things. They grow, need water, and make food for us. There are different types of plants based on their size and shape.

Trees

- Big and strong plants
- Have a thick trunk
- Live for many years

Examples: Mango tree, Neem tree, Banyan tree

Shrubs

- Small and bushy plants
- Have hard stems
- Not as tall as trees

Examples: Rose, Hibiscus, Cotton plant

Herbs

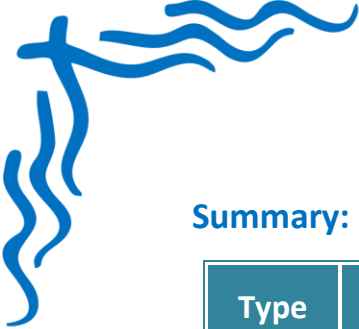

- Small and soft-stemmed plants
- Used in cooking and medicines

Examples: Mint, Coriander, Tulsi

Climbers

- Weak stemmed plants
- Need support to climb up

Examples: Money plant, Grape vine, Pea plant

Summary:

Type	Features	Examples
