

Using Directions in Finding Place

Why Do We Use Directions?

- Directions help us know where to go.
- They guide us to reach the correct place.
- They are like clues that tell us which way to move — left, right, straight, or turn around!

How to Use Directions?

i. Look at the Sun

- The sun rises in the East. That helps you find the other directions too!

ii. Use Landmarks

- “The school is north of the park.”
- “The market is to the left of the bus stop.”

Example:

Rita wants to go to her friend’s house.

- Her mom says:
- “Walk east from the post office.
- Then turn right (south) at the school.
- Her house is just next to the park.”

By following the directions, Rita can find the house easily!

Fun Fact:

Explorers and adventurers use directions to find new places all over the world!
