

Addition of Rupees and Paise

Understanding Notes

In this topic, we learn how to add amounts of money. We need to make sure both rupees and paise are added properly.

Steps to Add Money:

- i. Add Paise First: Start by adding the paise (the smaller unit).
- ii. Convert Paise to Rupees: If the total paise is 100 or more, convert it into rupees.
100 paise = 1 rupee.
- ii. Add Rupees: Finally, add the rupees.

Examples:

➤ ₹ 12.50 + ₹ 15.75

- ✓ Add paise: $50 + 75 = 125$ paise (which is 1 rupee and 25 paise).
- ✓ Add rupees: $12 + 15 + 1$ (from the 125 paise) = 28 rupees and 25 paise.

➤ ₹ 20.30 + ₹ 10.90

- ✓ Add paise: $30 + 90 = 120$ paise (which is 1 rupee and 20 paise).
- ✓ Add rupees: $20 + 10 + 1$ (from the 120 paise) = 31 rupees and 20 paise.

➤ ₹ 5.50 + ₹ 3.60

- ✓ Add paise: $50 + 60 = 110$ paise (which is 1 rupee and 10 paise).
- ✓ Add rupees: $5 + 3 + 1$ (from the 110 paise) = 9 rupees and 10 paise.

➤ ₹ 8.40 + ₹ 7.50

- ✓ Add paise: $40 + 50 = 90$ paise.
- ✓ Add rupees: $8 + 7 = 15$ rupees and 90 paise.

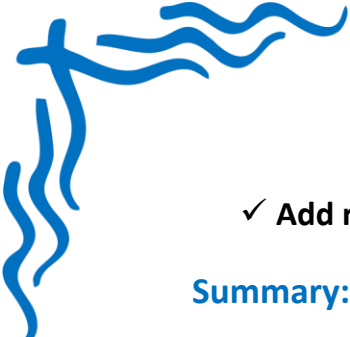

➤ ₹ 11.25 + ₹ 9.30

- ✓ Add paise: $25 + 30 = 55$ paise.
- ✓ Add rupees: $11 + 9 = 20$ rupees and 55 paise.

Visual Representation:

➤ ₹ 18.75 + ₹ 7.25

- ✓ Add paise: $75 + 25 = 100$ paise = 1 rupee.

✓ **Add rupees:** $18 + 7 + 1$ (from paise) = 26 rupees.

Summary:

- Add paise first, then convert to rupees if necessary.
 - Add rupees after converting paise.
 - Ensure both units are handled properly to avoid mistakes.
-
