- ⦿ **Introduction** : the first paragraph that tells readers what the essay is about.
- ⦿ **Body** : two to three paragraphs that discuss the details of essay.
- ⦿ **Conclusion** : the last paragraph in which the points mentioned above are concluded.

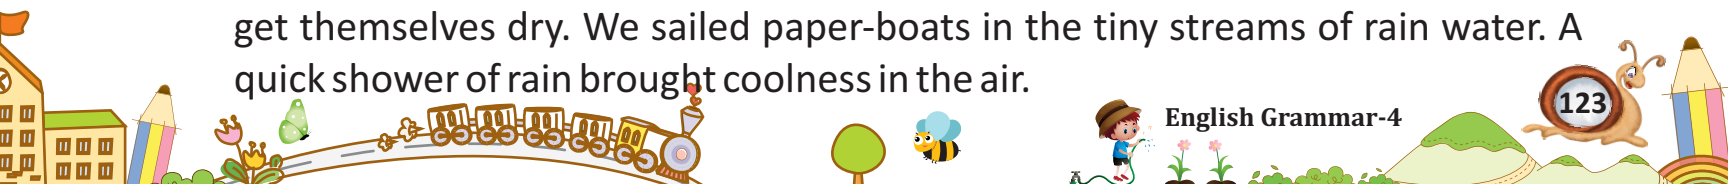

A Rainy Day

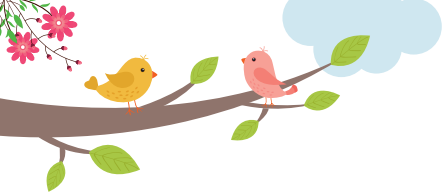

Change is the law of nature. Like all natural things seasons also change with the passage of time. In India summer season is followed by the rainy season. People pray for rains, when the hot rays of the Sun burn the skin. When the heaps of dark clouds come near to each other and the sky roars with the lightning, every heart bounces with joy.

Last evening I was at my uncle's place. It was very hot outside. Suddenly, the clouds came together and clashed with each other. After lightning and thunder for some time, it started drizzling. In no time, it was raining cats and dogs.

I looked in the street. The people were coming and going with umbrellas in their hands. The children walked up and down the streets. They were overjoyed with the rains and laughing in joy.

A flock of birds, sitting on the electricity wires, shook their bodies vigorously to get themselves dry. We sailed paper-boats in the tiny streams of rain water. A quick shower of rain brought coolness in the air.

Books are Our Friends

Books play a vital role in our lives and are often regarded as our closest companions. They are a rich source of knowledge that supplements our education. While school teaches us many things, books are essential for a deeper understanding of subjects.

One unique aspect of books is their constant presence. Unlike teachers or advisors, books are always accessible.

They serve as valuable references, helping us clarify doubts, revisit forgotten concepts, and explore new ones. Some might argue that books can be expensive, but their true worth surpasses any monetary value. They offer insights and experiences money can't buy. Whether we're on a journey or have spare time at home, reading books is a productive and enjoyable way to spend our moments. Using books effectively requires organization and wise choices. Different situations call for different types of books. Some people turn to literature like the Ramayana or religious texts to find solace and peace during challenging times. Books authored by great minds instill noble thoughts and enhance analytical skills. However, it's crucial to apply the knowledge gained practically rather than merely accumulating it. Effective book use encompasses various knowledge areas, from technical subjects to language skills, general knowledge, and even recreational reading. Books empower us, boosting our confidence and knowledge base. Keeping a notebook to jot down important insights and thoughts while reading is a valuable habit. Respecting books involves caring for them. Protecting them from moisture and dust is essential. Avoiding excessive doodling or derogatory remarks in books maintains their integrity. In today's digital age, books have evolved from paperbacks to e-books online. The choice between physical and digital formats depends on personal preference.

In conclusion, books are a cornerstone of human progress. They document laws, concepts, sciences, thoughts, inventions, and discoveries passed down by our ancestors, driving the advancement of our civilization. Embracing books with care and wisdom is the key to unlocking their immense potential in our lives.

Write essays on following topics.

1. My City / Town
2. A Visit to a Zoo
3. Mother Teresa
4. Durga Puja
