The VISPL – VISIONet Solutions

VISIONet™ eLearning brings learning to the masses. Traditionally, the best learning environments provided an integrated mix of synchronous and asynchronous learning activities in combination with dynamic opportunities for collaboration with experts and peers. VISIONet™ eLearning provides this type of environment, as it incorporates well-established teaching methodologies and proven educational philosophies, and enhances them with a rich mix of interactive media developed in response to rapid growth and changes in school training needs and environment.

At VISPL, we've made education interactive, convenient and effective. We combine years of experience in the educational field with domain expertise to bring the best educational resources to diverse audiences, regardless of physical location.

VISIONet™ provides a proven and highly scalable solution to rapidly create, deploy, and manage interactive multimedia based learning content. At the core of the VISIONet™ e-Learning suites, VISIONet™ is a robust and scalable platform that offers interactive multimedia courseware (with interactive multimedia based courseware for classes IX to XII as per the CBSE curriculum), learning content management and assembly, personalized content delivery, learner collaboration, learner tracking and assessment, training administration and custom content authoring and deployment.

VISIONet™ distinguishes itself from other e-Learning products in its usability - most notably its ease of installation, ease of administration, ease of comprehension and ease of use. What further distinguishes VISIONet™ is its support for rapid conversion of existing learning content to the eLearning format and its unique Learning Object architecture. VISIONet™ support for multimedia, multiple languages and customization makes training a delightful experience.

VISIONet™ learning system is an instant training automation platform blended with ready-to-use interactive multimedia school curriculum based courseware of over 1500+ hours of multimedia and seamlessly integrated with a robust training creation, deployment, and management/ administration tools.

Tie Ups:-

Quality is never accidental. It is the out come of high intentions, sincere effort, and skillful execution.

High-quality eLearning content authoring on a large scale, flexible deployment using logic that adapts learning to individuals' skill needs, and updating and reusing content over time to create new learning experiences for new audiences from a previous investment.

We have team of 40 Professors,80 Professional Content Provider, 20 Teachers and 35 workers.

Engineering Contents have been prepared by expert Professors of BHARATI VIDYAPEETH'S COLLEGE OF ENGINEERING & ITM Gurgoan.
